Dear Sir / Madam,

It gives us immense pleasure to welcome you to “Glaucovision: Seeing Beyond IOP”, a comprehensive Continuing Medical Education (CME) programme dedicated to the evolving concepts in glaucoma diagnosis and management.

This academic gathering brings together experienced clinicians and experts who will share practical insights, recent advances, and real-world strategies in managing glaucoma—from early detection and medical therapy to lasers, surgery, and special clinical scenarios.

The programme is thoughtfully structured into focused sessions covering diagnostics, medical management, interventional approaches, and complex glaucoma situations. With interactive lectures, case-based discussions, and a quiz session, we hope to create an engaging learning environment that enhances both knowledge and clinical decision-making.

We sincerely thank all our esteemed speakers, panelists, and delegates for being a part of this academic initiative. Your participation and enthusiasm are what make such educational platforms meaningful and successful.

We wish you a productive and enriching CME experience.

Warm regards,
Organising Team
Glaucovision 2026.
